**New catalogue and enhanced website
Released 13 March 2002**

European Safety Systems has published a new edition of its product line catalogue. Completely updated and redesigned, the 48 page 2002 edition gives full technical and performance details of the company's sounders, voice annunciators, loudspeakers, strobes and beacons for use in industrial, heavy duty, marine and hazardous environments.

To complement the updated print documentation, the company's web site, www.e-2-s.com, has also been enhanced and improved with the addition of data sheets for all products, application notes, technical support documentation and installation guides.

A number of new products are introduced in the new literature; in particular, the highly-specified BEx explosion-proof family is extended with the addition of combined sounder / strobe, speaker / strobe and programmable speech-tone / strobe units.
